PrinterOn Production Website July 2010 Release Notes

Product Changes and Enhancements

The July 2010 PrinterOn Production Website Maintenance Release includes numerous enhancements. The following is an overview of the changes made in this version of the PrinterOn Web Services.

- Improved the Google Maps integration for administrators to confirm location information for PrintSpots. Added larger map views, defaulted to hybrid view and added interactive coordinate updating when selecting positions on the map.
- Added a new registration process for Ricoh enabled Multi Function Printers.
- Improved messaging reported to users when a PrintSpot is offline.
- Improved messaging reported to the user when accessing offline PrintSpots using the PrintSpots Directory.
- Addressed an issue for legacy Generic HotSpot portals which reported an error in some conditions when updating account information.
